

# Muhammad Razi

**MERN Stack Web Developer (React & Node.js)**

Rahim Yar Khan, Pakistan  
+923367441190  
muhammadrazi3601@gmail.com

## PROFILE

Experienced Full Stack Web Developer | 2.5+ Years of Experience

I'm a skilled full-stack developer with expertise in the MERN stack (MongoDB, React.js, Next.js, Node.js), having over two and half years of experience in building dynamic and responsive web applications. My skills include backend development with Node.js and frontend development with React and Next.js, API development and integration, as well as efficient database management using MongoDB.

I have experience with user authentication using JWT and OAuth, payment gateway integration, real-time notifications with Socket.io, and role-based access control. My projects often involve creating interactive dashboards, AI-powered applications, and scalable, cloud-ready solutions.

## EMPLOYMENT HISTORY

Full Stack Developer, [Devloop Technologies], RYK (Feb 2025 - Present).

Apprenticeship(App Development), [Builtin Softs], RYK (Sept 2024 – Oct 2024).

Apprenticeship (Web Development), [NexSkills], Lahore (Apr 2024 – Aug 2024).

Full Stack Developer, Freelance Projects (2023 - Present).

## MAJOR PROJECTS

### **Spredd.ai (Sports Prediction Website)**

- Developed a dynamic prediction platform using the MERN stack where users can ask AI-powered predictions for player performance across six different sports.
- Integrated Stripe for secure and seamless payment processing.
- Designed a responsive user interface for real-time interaction and updated prediction results.

### **Byzino (eCommerce Website)**

- Developed a complete eCommerce platform with React, Express.js, and MongoDB.
- Included features like product listing, cart, checkout, and user authentication.
- Focused on responsive design and smooth user experience across devices.

### **Restaurant Website (Food Ordering System)**

- Built a full-featured restaurant website using React, Node.js, and MongoDB.
- Implemented a dynamic menu system that allows customers to browse and order various food items.
- Integrated backend functionalities to manage orders and menu updates efficiently.
